

Cree, Inc.
Non-GAAP Measures of Financial Performance

To supplement the company's consolidated financial statements presented in accordance with generally accepted accounting principles, or GAAP, Cree uses non-GAAP measures of certain components of financial performance. These non-GAAP measures include non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP gross margin, non-GAAP operating income and free cash flow.

Reconciliation to the nearest GAAP measure of all historical non-GAAP measures included in this press release can be found in the tables included with this press release. In this press release, Cree also presents its target for non-GAAP expenses, which is expenses less stock-based compensation expense, charges for amortization or impairment of acquisition-related intangibles and asset retirement charges.

Non-GAAP measures presented in this press release are not in accordance with or an alternative to measures prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with Cree's results of operations as determined in accordance with GAAP. These non-GAAP measures should only be used to evaluate Cree's results of operations in conjunction with the corresponding GAAP measures.

Cree believes that these non-GAAP measures, when shown in conjunction with the corresponding GAAP measures, enhance investors' and management's overall understanding of the company's current financial performance and the company's prospects for the future, including cash flows available to pursue opportunities to enhance shareholder value. In addition, because Cree has historically reported certain non-GAAP results to investors, the company believes the inclusion of non-GAAP measures provides consistency in the company's financial reporting.

For its internal budgeting process, and as discussed further below, Cree's management uses financial statements that do not include stock-based compensation expense, amortization or impairment of acquisition-related intangibles, or asset retirement charges, and the income taxes associated with the foregoing. Cree's management also uses non-GAAP measures, in addition to the corresponding GAAP measures, in reviewing the company's financial results.

As described above, Cree excludes the following items from one or more of its non-GAAP measures when applicable:

Stock-based compensation expense. This expense consists of expenses for stock options, restricted stock and employee stock purchases through its ESPP. Cree excludes stock-based compensation expenses from its non-GAAP measures because they are non-cash expenses that Cree does not believe are reflective of ongoing operating results.

Amortization or impairment of acquisition-related intangibles. Cree incurs amortization or impairment of acquisition-related intangibles in connection with acquisitions. Cree excludes these items because they arise from Cree's prior acquisitions and have no direct correlation to the ongoing operating results of Cree's business.

Asset retirement charges. In conjunction with Cree's plans to expand its manufacturing facilities, Cree has recognized charges for the impact of the decision to abandon or retire certain property and equipment prior to the end of their estimated useful lives. Because these charges relate to assets which have been or will be retired prior to the end of their estimated useful lives, Cree does not consider these charges to be reflective of ongoing operating results.

Income tax effects of the foregoing non-GAAP items. This amount is used to present each of the amounts described above on an after-tax basis consistent with the presentation of non-GAAP net income.

Cree expects to incur stock-based compensation expense, amortization or impairment of acquisition-related intangibles and asset retirement charges in future periods, including income taxes associated with all of the foregoing. In addition to the non-GAAP measures discussed above, Cree also uses free cash flow as a measure of operating performance. Free cash flow represents operating cash flows less net purchases of property and

equipment and patent and licensing rights. Cree considers free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business after the purchases of property and equipment, which can then be used to, among other things, invest in Cree's business, make strategic acquisitions, strengthen the balance sheet and repurchase stock. A limitation of the utility of free cash flow as a measure of financial performance is that it does not represent the total increase or decrease in the company's cash balance for the period.

CREE, INC.
Reconciliation of GAAP to Non-GAAP Measures
(in thousands, except per share amounts and percentages)
(unaudited)

Non-GAAP Gross Margin

	Three Months Ended	
	September 28, 2014	September 29, 2013
GAAP gross profit	\$ 135,820	\$ 150,757
GAAP gross margin percentage	31.8 %	38.6 %
Adjustment:		
Stock-based compensation expense	2,905	2,379
Non-GAAP gross profit	<u>\$ 138,725</u>	<u>\$ 153,136</u>
Non-GAAP gross margin percentage	32.4 %	39.2 %
